A/PSOLUTIONS FROM DATA REDUCTION SYSTEMS

AN INDISPENSABLE TOOL FOR ACCOUNTS PAYABLE DEPARTMENTS

Union, NJ -- September 5, 2006 -- Data Reduction Systems Corporation (DRS www.drscorp.com), a leading provider of information management products and services, recently announced the availability of A/Psolutions -- comprehensive document imaging tailored specifically for cross-industry accounts payable departments.

Featuring advanced technology and procedures, A/Psolutions quickly and reliably converts invoices, expense reports, payment records and similar payables documents into electronic images which are then easily accessed using simple index- or content-level searches.

Clients who successfully integrated A/Psolutions into their everyday departmental procedures will immediately experience greater workflow efficiencies and space savings. Streamlining paper intensive processes has also been proven to have a major impact on the bottom line. Once the reliance on paper documents is minimized, so too are the excessive costs of storing, accessing, retrieving and archiving them.

"A/Psolutions is a client-focused document imaging solution," said Rick McQuade, president of Data Reduction Systems Corporation. "It was developed specifically for the unique requirements of accounts payable departments regardless of company type, size or industry. Whether in a full or partial outsourcing capacity, we'll work with each client to design the best program for them. Fully scalable, A/Psolutions easily adapts to increasing demands. Clients can begin small and move toward a broader-based workflow application that will expand as the business grows."

McQuade continued, “Our 40,000 square foot processing facility features the latest in security and business continuity planning, which accounts for an unblemished record of maintaining, handling and safeguarding confidential data for our clients.”

A/Psolutions is part of a total family of information products and services from the DRS Business Solutions Group. Designed to meet enterprise-wide, departmental, and vertical market configuration needs, all are easy to support and maintain, as well as straightforward and intuitive.

About Data Reduction Systems

Since 1985, Data Reduction Systems Corp. has been at the forefront of new information management technologies.
